

Branchini - *Pignoletto 2012*

An indigenous variety to Romagna, Pignoletto nearly became extinct after the 70's and 80's when mass production was the norm. It is a very vigorous vine that requires a lot of work in the vineyards and constant pruning as they are resistant to training along wires. Straw-yellow color with slight hints of green, a delicate nose, fruity, intense, featuring the scent of hawthorne flowers and a captivating leesy quality. Quite dry, harmonious, and persistent with good acidity.
