WINES

Rose 2023

IGP OC Languedoc

The history of Vin de Pays d'Oc wines can be traced back to the 5th century when the Greeks planted the first vineyards near Narbonne. Along with parts of Provence, these are considered to be France's oldest vineyards. A rich and natural combination of steep slopes and hilly peaks with vineyards, and "garrigue" vegetation and a proximity to the Mediterranean Sea. The vineyards benefit from long hours of sun, concentrating the aromas, and dry cool breezes to maintain freshness in the grapes.

Climate: Mediterranean; sunny and dry

Soil: Gravel and Clay

Farming: Sustainable

Grape: 100% Syrah

Vinification: 100% destemmed, 12-hour temperature-controlled maceration to extract the pale pink color and delicate aromas, the must is pressed, and the skins and seeds removed, followed by cool fermentation in stainless steel tanks.

Tasting: A beautiful pale pink color with bright pink reflections. Vibrant, fruit-driven, floral aromas with a palate full of strawberries and tropical fruits and a refreshing finish.
